

OCALA BREEDERS' SALES COMPANY

Policy for Medication, Prohibited Practices, Riding Crops and Horseshoes (Updated February 2015)

Medication

All medication administered to a horse within 72 hours of an under tack show or beginning of a sales session must be reported the earlier of 12 hours after treatment or 1 hour **prior to an under tack show and/or sales session**. The reports must be signed by a Florida licensed veterinarian and submitted to the OBS main office or the medical information center. The reports must identify the medication and the amount, strength and mode of administration; the date and time of administration; and the diagnosis and/or reason for treatment. Medications may only be administered at or below manufacturers recommended dosages.

Under tack show – controlled therapeutic medication guidelines (New for 2015)

The administration of nonsteroidal anti-inflammatory drugs (NSAIDs) and bronchodilators must be in accordance with the Association of Racing Commissioners International (RCI) schedule for controlled therapeutic medications. **No medication may be administered within 24 hours of a horse's under tack show performance**. OBS will incorporate the entire RCI Controlled Therapeutic Medication Schedule for under tack shows by the 2016 OBS Two Year Old Sale season.

Additional restrictions/clarifications:

- 1) No more than two (2) non-steroidal anti-inflammatory drugs (NSAID) may be present in a test sample.
 - a) If two NSAIDs are administered prior to an under tack show, RCI stacking thresholds will apply.
 - b) Firocoxib (Equioxx) has a withdrawal guideline of 14 days
- 2) No more than one (1) corticosteroid may be present in a test sample. **Intra-articular injections of corticosteroids are prohibited on the sales grounds.**
- 3) Bronchodilators
 - a) Clenbuterol may not be administered within **14 days** of an under tack show or sales session in which the horse is entered.
 - b) Albuterol may only be administered intra-nasal per RCI dosage specifications and may not be administered within 72 hours of an under tack show or sales session in which the horse is entered. Administration of albuterol by any means other than intra-nasally has a high likelihood in resulting in a positive finding.
 - c) No other bronchodilator may be administered within 72 hours of an under tack show or sales session in which the horse is entered.
- 4) The following exogenous anabolic steroids or their esters may not be administered within 45 days of sale: Stanozolol, Boldenone, Nandrolone, or Testosterone. The administration of any other exogenous anabolic steroid at any time is prohibited.
- 5) The following medications may **not** be administered on the sales grounds:
 - a) All substances classified as either Class 1 or Class 2 by the Association of Racing Commissioners International (RCI).
 - b) Furosemide (Salix)
 - c) Procaine Penicillin

Please note: Fluphenazine (Prolixin), Reserpine (Serpasil), Carisoprodol (Soma, Rela) are class 2 medications. Please be aware that many herbal supplements contain prohibited substances including bronchodilators and stimulants.

Please review these medication policies with your veterinarian to assure compliance.

RCI Uniform Classification Guidelines: http://obssales.com/OBSPAGES/arci_model_rules_dec14.pdf

RCI Controlled Therapeutic Medication: <http://obssales.com/OBSPAGES/arci-controlled-therapeutic-medications-schedule.pdf>

Florida Statute 535.08: <http://obssales.com/OBSPAGES/FL%20Statute%20535.08.pdf>

These are also available at the OBS office and accessible on the OBS website under consignor information.

Testing

- 1) Post-breeze random testing will be performed on horses selected at the sole discretion of OBS.
- 2) Buyers may request testing for exogenous anabolic steroids at the time of purchase and for undisclosed medication within 24 hours of purchase.
- 3) Test results will be submitted to the Department of Agriculture as required. The consignor is subject to penalties described in Florida Statute Chapter 535.08 including being charged with a misdemeanor and barred from selling for a period of 2 years.

Prohibited Practices

Horses that have been subject to any of the following prohibited practices shall be subject to return or withdrawal:

- 1) **Extracorporeal Shock Wave Therapy or Radial Pulse Wave Therapy**
- 2) **Acupuncture and/or Electro-Stimulation** with the intent of altering laryngeal function
- 3) **Electrical devices** designed or used to increase the speed of a horse. Anyone in possession of a prohibited electrical device will be banned from the OBS sales grounds.
- 4) **Any invasive practice which intentionally conceals a material defect or chronic lameness.**
- 5) **Internal Blister or other injections** to the knee intended to have the effect of concealing the true conformation of the horse is not permitted at any time.

Use of a Riding Crop and Spurs at an Under Tack Show

At any time after the starting pole which the horse begins to breeze (i.e 1/8, 1/4, or 3/8), a rider may only use the riding crop while both hands are holding the reins and may not strike the horse behind the girth. A rider is prohibited from striking the horse in any manner beyond the finish line. In situations where the safety of the horse or rider is in jeopardy, a riding crop may be used in front of the girth. Excessive whipping before the beginning of the work or in preparation for a breeze is prohibited. Spurs are not allowed at an under tack show. Any infraction of this rule may result in a fine of \$500 fine to be paid by the consignor. Chronic offenders may be banned from riding on the sales grounds. The sales company or its representatives have full, final and sole authority to interpret and enforce this rule. Funds collected from fines levied will be distributed to a thoroughbred industry related charity at the sole discretion of Ocala Breeders' Sales Company.

Horseshoes

A horse at a two-year-old in training sale may not train with front shoes that have toe grabs which exceed 2mm, or bends, turn-downs, stickers, jar caulks or any other traction device. Turn-downs of more than ¼" will not be permitted on hind shoes. For training on the Safetrack surface, OBS recommends the use of only flat Queen's Plate, Queen's Plate XT or equivalent.

Summary of RCI recommended withdrawal times for administration of NSAIDs and Bronchodilators

Refer to RCI Controlled Therapeutic Medication Schedule – Version 2.1 April 17, 2014

NSAIDs – no more than 2 may be present in a test sample

- Diclofenac (Surpass)** 48 hours
Five inch ribbon topical application of 1% diclofenac liposomal cream formulation
5 nanograms per milliliter of plasma or serum
- Firocoxib (Equioxx)** 14 days
Oral administration as EQUIOXX oral paste at a daily dose of 0.1 milligram per kilogram for four days
20 nanograms per milliliter of plasma or serum
- Flunixin (Banamine)** 32 hours 48 hours secondary anti-stacking withdrawal guideline
Single intravenous dose of flunixin as Banamine (flunixin meglumine) at 1.1 milligram per kilogram
20 nanogram per milliliter of plasma or serum
Secondary anti-stacking threshold: 3.0 nanograms per milliliter of plasma or serum
- Ketoprofen (Ketofen, Orudis)** 24 hours 48 hours secondary anti-stacking withdrawal guideline
Single intravenous dose of ketoprofen as Ketofen at 2.2 milligrams per kilogram
2 nanograms per milliliter of plasma or serum
Secondary anti-stacking threshold: 1 nanogram per milliliter of plasma or serum
- Phenylbutazone (Bute)** 24 hours 48 hours secondary anti-stacking withdrawal guideline
Single intravenous dose of phenylbutazone at 4.0 milligrams per kilogram
2 micrograms per milliliter of plasma or serum
Secondary anti-stacking threshold: 0.3 micrograms per milliliter of plasma or serum

Please note that if two NSAIDs are administered the test samples may contain one of the NSAIDs listed above at a concentration up to the primary threshold and the sample may also contain another one of the NSAIDs but Flunixin, Ketoprofen, or Phenylbutazone must be at a concentration up to the Secondary Threshold.

Bronchodilators

- Albuterol (Proventil, Ventolin)** 72 hours
720 micrograms total dose intra-nasal only. Based upon dosing up to 4 times per day
1 nanogram per milliliter of plasma or serum
Administration of albuterol by any means other than intra-nasally has a high likelihood in resulting in a positive finding. This specifically includes oral administration. Veterinarians are cautioned against using oral albuterol.
- Clenbuterol (Ventipulmin)** 14 days
Oral administration of clenbuterol as Ventipulmin® syrup at 0.8 mcg/kg twice a day
140 picograms per milliliter of urine or Level of Detection in plasma or serum

Medication and Prohibited Practices Penalties

- 1) If a positive test result is received and a confirmation test is not requested or is confirmed by a laboratory selected by OBS for the administration of:
 - a) Any exogenous anabolic steroids administered within 45 days;
 - b) Undisclosed medication administered within 72 hours;
 - c) An RCI class 1 or 2 medication, Salix, procaine penicillin;
 - d) Clenbuterol administered within 14 days, or any other bronchodilator administered within 72 hours;

The purchaser shall have the right to rescind the sale and the consignor shall refund any sales proceeds paid to consignor by OBS and pay the purchaser or OBS all proper expenses and legal fees incurred by either of them from the time of the sale until the return of the horse to the consignor or consignor's owner.

If the horse did not go through the auction ring, the horse shall be withdrawn from the sale and shall be removed from the sales grounds immediately. The consignor shall be responsible for OBS fees, penalties, and expenses.

If the horse went through the auction ring and was not sold, the horse shall be removed from the sales grounds immediately. The consignor shall be responsible for OBS fees, penalties, and expenses.

- 2) Horses that have been subject to any of the following prohibited practices shall be subject to return or withdrawal and the consignor shall be responsible for expenses incurred by the purchaser and for OBS fees, penalties, and expenses:
 - a) Extracorporeal Shock Wave Therapy or Radial Pulse Wave Therapy
 - b) Acupuncture and/or Electro-Stimulation with the intent of altering laryngeal function
 - c) Electrical devices designed or used to increase the speed of a horse. Anyone in possession of a prohibited electrical device will be banned from the OBS sales grounds.
 - d) Any invasive practice which intentionally conceals a material defect or chronic lameness.
 - e) Internal Blister or other injections to the knee intended to have the effect of concealing the true conformation of the horse is not permitted at any time.
- 3) The consignor will be subject to the penalties in section four (4) if a positive test result is received and a split sample test is not requested or is confirmed by a laboratory selected at the sole discretion of OBS which indicates the administration of:
 - a) Nonsteroidal anti-inflammatory drugs (NSAID) or bronchodilators at levels above the threshold indicated in the RCI Controlled Therapeutic Medication Schedule - Version 2.1, Revised April 17, 2014
 - b) Any medication within 24 hours of the horse's under tack show performance
 - c) More than one (1) corticosteroid
 - d) More than two (2) non-steroidal anti-inflammatory drugs (NSAIDs)
- 4) The consignor will be subject to the following penalties for positive test results in section One (1) and Two (2); or prohibited practices in section Three (3):
 - a) 1st offense - Warning with a maximum fine of \$1,000; possible increased testing of consignors' horses at consignor expense.
 - b) 2nd offense - Warning with a maximum fine of \$1,500; increased testing of consignors' horses at consignor expense; possible suspension of consignor for up to 1 year to be determined by OBS Board of Directors.
 - c) 3rd offense - Fine of \$500 to \$2,500 absent mitigating circumstances; increased testing of consignors' horses at consignor expense; possible suspension of consignor for up to 2 years to be determined by OBS Board of Directors.
- 5) Funds collected from fines levied will be distributed to a thoroughbred industry related charity at the sole discretion of the sales company. Fines will be deducted from proceeds when available. Failure to pay fines may result in suspension from participating in OBS Sales.

I hereby acknowledge receipt of the Ocala Breeders' Sales Company, Inc. Policy for Medications, Prohibited Practices, Riding Crops, and Horseshoes and that I have read the foregoing terms and agree to comply with them and have signed this with full and complete understanding thereof.
